Education

H R Institute of Engineering and Technology (CGPA: 7.0)
Diploma in Computer Science Engineering

June 2022 – July 2025
Meerut Rd Ghaziabad, Uttar Pradesh 201003

Govt. Boys Sr. Sec. School
High School (10th)

May 2021 – March 2022
New Seemapuri, New Delhi-95

Ajay Kumar Garg Engineering College
Pursuing Bachelor of Technology in Computer Science

September 2025 – Current
Delhi Meerut Expressway Ghaziabad-201015

Skills

Programming Languages: Python(Basic), JavaScript(ES6+)

Frontend Technologies/Framework : HTML5, CSS3, SCSS, ReactJS, JavaScript

Backend Technologies/Frameworks: ExpressJS, NodeJS

Database: MongoDB

Developer Tools: VS Code, Postman, Git

Version Controls: Git and GitHub

GenerativeAI / AI Tools: Google Gemini API

Soft Skill: Teamwork. Collaboration, Adaptability, Leadership, Creative & Innovation, Problem Solving

Project

Moody Player | *MongoDB, ExpressJS, ReactJS, NodeJS, Face-api.js* | August 2025

- Built a dynamic backend using Node.js and Express.js, seamlessly integrated with MongoDB for **efficient data management**.
- Designed an engaging **React-based frontend** with **Tailwind CSS**, enhancing user experience and responsiveness.
- Developed robust RESTful APIs to handle **authentication, data storage, and retrieval processes**.
- Integrated advanced machine learning models to enable **real-time mood detection and analysis**.

MoviGenix | *ReactJS, Tailwindcss, NodeJS, ExpressJS, MongDB* | November 2025

[Click Here](#)

- **Premium Dark-Themed Streaming Hub** that offers a visually stunning, glassmorphic UI for browsing and watching movies, TV shows, anime, and cartoons without clutter. Fast and responsive results, providing a **smooth and lag-free** searching experience.
- **Personalization & Categorization** that automatically sorts content into tailored genre sliders while delivering personalized recommendations based on user interests.
- **Dual Auth & Active Session Handler** that supports both traditional email and Google OAuth logins, securing user accounts with JWTs and capturing live session heartbeats.

SwiftSupport | *ReactJS, Tailwindcss, NodeJS, ExpressJS, MongDB* | November 2025

[Click Here](#)

- **AI-powered customer support chatbot** that instantly searches the **Knowledge Base** and provides accurate responses without requiring human intervention.
- **Automatic ticket escalation** system that creates and assigns support tickets whenever the AI cannot resolve a customer's query.
- **Role-based dashboards** for Admins, Agents, and Customers, ensuring organized **support management**, secure access control, and efficient workflow handling.
